

janusGATE™ FedLink Monitor Fact Sheet

janusGATE FedLink Monitor

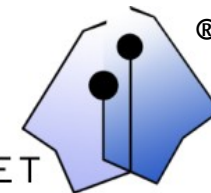

- A desktop application that email gateway administrators use to monitor and export information posted on the Australian Government's FedLink status website.
- janusGATE FedLink Monitor allows a Commonwealth agency to easily maintain address lists about organisations connected to the FedLink Virtual Private Network in its email gateway.
- Vendor: janusNET Pty Limited
- Current version: 1.1
- Minimum operating environment requirements:
 - Microsoft Windows XP Professional
 - Microsoft .Net Framework version 2.0
 - Web access (HTTP)
 - Organisation connected to FedLink

Features

- Compares latest FedLink web site data to a local reference file so any changes are clearly apparent.
- Export FedLink status information in formats compatible with variety of email gateways.
- Automated start actions including fetching latest status and exporting information.
- An extensible export mechanism that can be adapted to work with any email gateway that supports importing of addresses from text files.
- Can export complete status information or only the changes from last status check.
- Removes information about organisation's own email domain(s) from exported records.

janusGATE™ FedLink Monitor

Benefits

- Gateway administrators do not have to labouriously scrutinise the FedLink web page to try and discern any changes that have occurred.
- Gateway administrators do not have to copy and paste information from the FedLink web page into their email gateway.
- Automated start actions and scheduling of janusGATE FedLink Monitor means that it can run daily with little user intervention required.
- Gateway administrators can maintain an archive of all FedLink web pages that are retrieved for audit purposes.

Complementary Products

- janusNET products:
 - janusSEAL for Outlook – apply protective markings to emails sent from Microsoft Outlook
 - janusSEAL for OWA – apply protective markings to emails sent from Microsoft Outlook Web Access
- Email gateways – out of the box janusGATE FedLink Monitor can export address list information to:
 - ClearSwift MIMESweeper
 - Sophos PureMessage
 - SurfControl E-mail Filter
 - TumbleWeed MailGate
 - (can be readily extended to support other gateways that import plain text file address lists)

Support

- janusGATE Fedlink Monitor is supported via janusNET's online support resources including forums, knowledge base and FAQs.

Licensing

- Provided free of charge to organisations with an existing janusSEAL for Outlook and/or janusSEAL for OWA production license
- Organisations without a janusSEAL for Outlook or janusSEAL for OWA license can purchase janusGATE FedLink Monitor from janusNET or one of its authorised resellers. Visit the janusNET website for more details.

About janusNET

janusNET is an Australian company (ABN 80 112 197 690) formed in 2004 that offers simple to use asset based security solutions for electronic information.

Asset based security involves the provision of security at a level that is appropriate for the value of the asset that is being protected. janusNET's solutions are focused on ensuring the information systems are responsible for ongoing protection of sensitive and valuable electronic assets once the end-users have indicated the value of the asset to the system.

janusNET's directors have a long history of research and development, innovative thinking and an ability to solve problems that others are afraid to tackle. janusNET are leading the Australian market in the provision of asset based security solutions.

janusNET's staff are called on by the Defence Signals Directorate, AGIMO and other major Australian Government Agencies for their email security expertise.
